QUESTION 133 For which two reasons BVI is required in the Transparent Cisco IOS Firewall? (Choose two) A. BVI is required for the inspection of IP traffic. B. The firewall can perform routing on bridged interfaces. C. BVI is required if routing is disabled on the firewall. D. BVI is required if more than two interfaces are in a bridge group. E. BVI is required for the inspection of non-IP traffic. F. BVI can manage the device without having an interface that is configured for routing. Answer: DF

QUESTION 134 Drag and Drop Question Drag each step in the configuration of a Cisco ASA NSEL export to a NetFlow collector on the left into the correct order of operations on the right. Answer: QUESTION 135 Which two U.S. government entities are authorized to execute and enforce the penalties for violations of the Sarbanes-Oxley (SOX) act? (Choose two) A. Federal Trade Commission (FTC) B. Internal Revenue Service (IRS) C. Office of Civil Rights (OCR) D. Federal Reserve Board E. Securities and Exchange Commission (SEC) F. United States Citizenship and Immigration Services (USCIS) Answer: DE

QUESTION 136 Which three are RFC 5735 addresses? (Choose three.) A. 171.10.0.0/24 B. 0.0.0.0/8 C. 203.0.113.0/24 D. 192.80.90.0/24 E. 172.16.0.0/12 F. 198.50.100.0/24 Answer: BCE

QUESTION 137 Refer to the exhibit. Which statement about this configuration is true? A. The ASA stops LSA type 7 packets from flooding into OSPF area 1. B. The ASA injects a static default route into OSPF area 1. C. The ASA redistributes routes from one OSPF process to another. D. The ASA redistributes routes from one routing protocol to another. E. The ASA injects a static default route into OSPF process 1. Answer: C

QUESTION 138 Drag and Drop Question Drag and drop step in the flow of packets on a DMVPN network using GDOI on the left into the correct sequence on the right. Answer: QUESTION 139 When attempting to use basic HTTP authentication to authenticate a client, which type of HTTP message should the server use? A. HTTP 200 with a WWW-authenticate header. B. HTTP 401 with a WWW-authenticate header. C. HTTP 302 with an authenticate header. D. HTTP 407. Answer: B

QUESTION 140 Drag and Drop Question Drag and Drop each Cisco Intrusion Prevention System anomaly detection event action on the left onto the matching description on the right. Answer: QUESTION 141 Which two statements about the ISO are true? (Choose two) A. The ISO is a government-based organization. B. The ISO has three membership categories: member, correspondent, and subscribers. C. Only member bodies have voting rights. D. Correspondent bodies are small countries with their own standards organization. E. Subscriber members are individual organizations. Answer: BC

QUESTION 142 What feature on Cisco IOS router enables user identification and

authorization based on per-user policies A. CBAC B. IPsec C. Authentication proxy D. NetFlow v9 E. Zone-based firewall F.

EEM Answer: C QUESTION 143 Which two statements about WPA 2 with AES CCMP encryption are true? (Choose two) A. AES CCMP is a block cipher B. It is compatible with TACACS+ servers running LEAP authentication C. Every wireless packet sent to the host is tagged with CCMP frames D. It uses a 256-bit hashing key E. The MIC prevents modifications of wireless frames and replay attacks F. It uses a 128-bit hashing key Answer: AF QUESTION 144 Refer to the exhibit. You have received an advisory that your organization could be running a vulnerable product. Using the Cisco Systems Rapid Risk Vulnerability Model, you determine that * Your organization is running an affected product on a vulnerable version of code vulnerable component is enabled and there is no feasible workaround * There is medium confidence of an attack without significant collateral damage to the organization. According to the model what is the appropriate urgency for remediation? A. priority maintenance process B. contact ISP to trace attack C. no action required D. remove vulnerable device from service E. standard maintenance process F. immediate mitigation process Answer: E QUESTION 145 When configuration Cisco IOS firewall CBAC operation on Cisco routers, the "inspection rule" can be applied at which two location? (Choose two) A. at the trusted and untrusted interfaces in the inbound direction B. at the trusted interface in the inbound direction C. at the trusted and untrusted interfaces in the outbound direction D. at the untrusted interface in the inbound direction E. at the trusted interface in the outbound direction Answer: AC Explanation:
